FRONT END DEVELOPER

Front-End / Full-Stack Developer with 4+ years of experience building scalable and high-performance web applications using React.js, Next.js, Vue.js, JavaScript, and TypeScript. Experienced in developing enterprise dashboards, optimizing data-heavy applications, and improving performance through rendering optimization, caching, async processing, reusable component architecture, and API integration. Skilled in migrating applications from Vue.js to Next.js for better scalability and SEO, with hands-on experience in Node.js, Express.js, MongoDB, Redis, and Supabase for full-stack development.

SKILLS

React.js
Next.js

Vue.js
TanStack Query

Supabase
MongoDB

RESTful APIs
Web Workers

Performance Optimization
JavaScript

PROFESSIONAL EXPERIENCE

IThink Logistics

Front-End Developer | Nov 2023 – Present

- Improved and maintained enterprise-level dashboards using Vue.js, Vuex, React.js, Next.js, and TypeScript for large-scale business applications.
- Played a key role in migrating applications from Vue.js to Next.js to improve rendering performance, SEO, scalability, and overall application speed.
- Optimized complex data table workflows, reducing processing time from nearly one month to just a few hours using caching, asynchronous processing, batching, and frontend optimization techniques.
- Improved application performance through code-splitting, lazy loading, rendering optimization, reusable component architecture, and API response optimization.
- Implemented advanced UI interactions, animations, and responsive interfaces to enhance user engagement and frontend usability.
- Worked extensively with large datasets, API integrations, state management, and performance-critical frontend workflows.
- Built reusable and scalable component structures to improve maintainability, development speed, and code quality across projects.
- Collaborated closely with backend developers, designers, and QA teams in Agile/Scrum environments to deliver scalable frontend solutions.
- Contributed to frontend architecture decisions, code reviews, and best practices across both React.js and Vue.js ecosystems.

Agarwal Packers and Movers Ltd

Front-End Developer | Feb 2022 – Oct 2023

- Developed dynamic and responsive client dashboards using React.js and JavaScript, improving operational efficiency and user experience.
- Integrated dashboard workflows with WhatsApp Bot APIs to automate communication and provide real-time customer updates.
- Reduced manual support efforts and improved workflow automation through chatbot-driven interactions and status tracking.
- Optimized frontend performance, UI/UX, and application responsiveness across multiple web applications.
- Built reusable and maintainable frontend components following scalable architecture and clean coding standards.
- Collaborated with backend developers, designers, and QA teams in an Agile development environment.

PROJECTS

Invoice App

Created an invoice application with Next.js 15, integrating Xata for the database, Clerk for authentication, and Stripe for payments. This app enables users to generate and manage invoices efficiently.

WallpaperChanger

A platform that lets you effortlessly change your desktop wallpaper. Browse a diverse collection of stunning wallpapers and instantly transform your background with just a click.

Migraine Tracker

A migraine tracker website with Next.js and Supabase to effortlessly log and monitor migraine attacks.

Admin Dashboard

Built a React-based Admin Dashboard integrated with MongoDB for seamless activity tracking and efficient management of data and processes, enhancing organizational productivity and insights.

WhatsApp Bot

expanded an e-commerce WhatsApp bot utilizing the official API, allowing users to easily view and shop for products, streamlining the shopping experience through WhatsApp messaging.

Nutrition

Generated a nutrition landing page using React that offers meal suggestions through API integration, enhancing user experience and promoting healthy choices.

Express Builder

Built an express code generator with React, allowing users to input MongoDB URL, database, and collection names for effortless CRUD operation implementation.

CryptoWorld

Enhanced a React-based cryptocurrency world platform with live price updates, offering a comprehensive view of various cryptocurrencies through API integration.

EDUCATION

Nagindas Khandwala College

Pursuing an MSC in Information Technology (IT).
06/2022 - 05/2024

Nagindas Khandwala College

Graduate in Bachelor of Science in Information Technology (BSCIT).
05/2019 - 04/2022

B.S.G.Ds' Junior College

Computer Science
05/2017 - 04/2019

S.L. Porwal English Medium High School

05/2007 - 04/2017
